Thanks for hosting us this week, Randy!
 I'm impressed by your operation. You're getting great coverage, but the tedium has probably set up by now. Good thing ZiZi is coming next week - you know she'll want to ride the quads.

 Subject: Haystack #1 AUM assessment

If interested, check out:

www.epaossc.org/haystack1

Across the top tool bar you will see 'map'. Click on that. Once the map loads, on the right middle under bookmarks, click on Haystack No.1 AUM. Like google earth, on the left, under layer visibility, select Haystack No.1 AUM and expand the layer by clicking on the triangle.

Turn on the gamma scans from days past or today. If you have today on, it should update every 5 minutes, so you can track progress. We are using 4 meter / probe combos. We have up to 180 acres to cover.

As we process other info, our sampling and Geoprobe data will be added.

Enjoy, comments welcome.

Forward as needed.
